

**STANDARD CONTRACT RIDER NO. 1
FUEL COST ADJUSTMENT
(Applicable to Rate 1 and Rate 2)**

Issued Pursuant to
Cause No. 41969 FAC 72
Effective
February 1, 2024
Indiana Utility Regulatory Commission
Energy Division

A fuel cost adjustment shall be made in accordance with the following provisions:

- A. The fuel cost adjustment per therm shall be calculated by multiplying the Therms billed by an Adjustment Factor established according to the following formula:

$$\text{Adjustment Factor} = F/S$$

where:

1. "F" is the estimated expense of fuel based on a three-month average cost beginning with the month of February 1, 2024 and consisting of the following costs:
 - (a) the average cost of fuel burned for the production of steam in the Utility's plants, including only those items listed in Account 151;
 - (b) the average cost of purchases from the Indianapolis Resource Recovery Project (Covanta) of displaced net steam to mains.
 2. "S" is the estimated applicable sales in Therms for the same estimated period set forth in "F".
- B. The Adjustment Factor shall be further modified to reflect the difference between fuel cost billed and fuel cost actually experienced during the three-month period ending July 31, 2023, and other Commission authorized adjustments as appropriate.
- C. The Adjustment Factor to be effective with meter readings on February 1, 2024 for all General Service and Demand Rate Accounts is \$0.53244 per Therm.
