STANDARD CONTRACT RIDER NO. 1 FUEL COST ADJUSTMENT (Applicable to Rate 1 and Rate 2)

A fuel cost adjustment shall be made in accordance with the following provisions:

A. The fuel cost adjustment per therm shall be calculated by multiplying the Therms billed by an Adjustment Factor established according to the following formula:

Adjustment Factor = F/S

where:

- 1. "F" is the estimated expense of fuel based on a three-month average cost beginning with the month of November 1, 2025 and consisting of the following costs:
 - (a) the average cost of fuel burned for the production of steam in the Utility's plants, including only those items listed in Account 151;
 - (b) the average cost of purchases from the Indianapolis Resource Recovery Project (Reworld) of displaced net steam to mains.
- 2. "S" is the estimated applicable sales in Therms for the same estimated period set forth in "F".
- B. The Adjustment Factor shall be further modified to reflect the difference between fuel cost billed and fuel cost actually experienced during the three-month period ending April 30, 2025, and other Commission authorized adjustments as appropriate.
- C. The Adjustment Factor to be effective with meter readings on November 1, 2025 for all General Service and Demand Rate Accounts is \$0.70805 per Therm.

Current base rates effective pursuant to I.U.R.C. Order in Cause No. 45855
