62nd/Michigan Septic Tank Elimination and Drainage Improvements

Citizens Water is working to replace failing septic systems with sanitary sewers in the 62nd Street/Michigan Road area on the city's northwest side.

The Problem

Septic systems have a limited life and eventually fail. In addition, the soil types in Marion County are poor for septic waste absorption. As a result, human waste leaches into groundwater, backyards and neighborhood ditches and streams. Failing septic systems are linked to unsafe levels of *E. coli* in many neighborhood streams and ditches.

The Solution

Approximately 248 properties are part of the 62nd/Michigan project, as shown on the map on Page 2. This project will include installing new sanitary sewers, manholes, street resurfacing and drainage improvements.

To address health hazards in our neighborhoods, the Septic Tank Elimination Program (STEP) was implemented to convert many neighborhoods on septic systems to the sanitary sewer system. STEP plans include bringing sewers to approximately 7,000 homes by 2013. This will address more than 25 percent of the 25,000 homes still on septic systems in Indianapolis. Neighborhoods with higher septic system failure rates are the priority of STEP.

Project Status

Project Status: In Construction

Anticipated Construction Period: Summer 2011 to Summer 2012

Construction Contractor: Eagle Valley, Inc.

Estimated Project Costs: \$5.3 million

Approximate Number of Properties In The Project: 248

Project Benefits:

- Improved environmental and health conditions for homes and neighborhoods
- Greater protection for well water, streams and drainage ditches

Construction Project Manager: Tim Lawson, TLawson@dlz.com, 317-509-4284

STEP Information Line: 317-927-4328

Marion County Health Department: Mike Goodin, 317-221-2147

Project Schedules And Costs Are Subject To Change.
