# Southeastern/ Raymond Septic Tank Elimination

Citizens Water is working to replace failing septic systems with sanitary sewers in the Southeastern Avenue/Raymond Street area on the city's southeast side.

## The Problem

Septic systems have a limited life and eventually fail. In addition, the soil types in Marion County are poor for septic waste absorption. As a result, human waste leaches into groundwater, backyards and neighborhood ditches and streams. Failing septic systems are linked to unsafe levels of *E. coli* in many neighborhood streams and ditches.

## The Solution

Approximately 400 properties are part of the Southeastern/Raymond project, as shown on the map on Page 2. This project will include installing new sanitary sewers, manholes, street resurfacing and incidental drainage improvements.

To address health hazards in our neighborhoods, the Septic Tank Elimination Program (STEP) was implemented to convert many neighborhoods on septic systems to the sanitary sewer system. STEP plans include bringing sewers to approximately 7,000 homes by 2013. This will address more than 25 percent of the 25,000 homes still on septic systems in Indianapolis. Neighborhoods with higher septic system failure rates are the priority of STEP.

## Project Status

**Project Status:** In Construction

**Anticipated Construction Period:** Spring 2012 to Winter 2013

**Design Engineer:** HWC Engineering

**Construction Contractor:** Eagle Valley Inc.

**Estimated Project Costs:** \$11.2 million

**Approximate Number of Properties In The Project:** 400

### Project Benefits:

- Improved environmental and health conditions for homes and neighborhoods
- Greater protection for well water, streams and drainage ditches

**Construction Manager:** Mary Zurbuch

- Field Office: 317-352-1760

**STEP Information Line:** 317-927-4328

**Marion County Health Department:** Mike Goodin, 317-221-2147

Project Schedules And Costs Are Subject To Change.
